

COTTON WRAP FILM

Our premium blue cotton wrap is designed to use in John Deere Cotton Pickers (770/690). We use multi-cross extrusion technology to enhance the physical performance of the film and make it the best choice for you in the field. Special glue technology prevents cotton from sticking to the wrap. The outer layers are a special formulated film which is tacky on one side only. The combination of two types of film ensures that the round module will hold its uniformity for transport and processing.

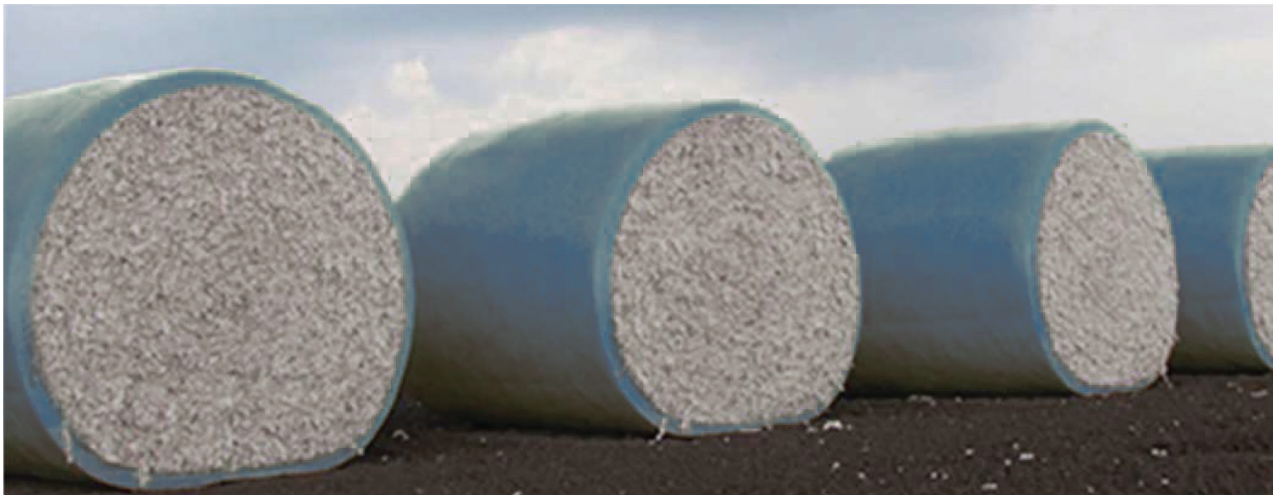

24 PRE-CUT PORTIONS

Our premium blue cotton wrap is made of pre-cut wrap portion in order to assure the next portion is ready to be fed correctly during the packing. The roll is made from 24 "ready to use" portions.

PARAMETERS	RESULT
Roll Width	8.85 ft / 2.7 m
Plastic Core Width	9.19 ft / 2.8 m
Roll Diameter	10 in / 254 mm
Roll Weight	220 lbs / 100 kg
Individual Sheet Length	69 ft / 21 m
Pallet Size (mm)	W 750 x H 1150 x 2820
Qty. Per Roll	24 sheets/roll
Qty. Per Pallet	9 rolls/pallet or 12 rolls/pallet, mixed
FILM PROPERTY	VALUE
Thickness	0.073-0.078 um
Tensile Strength (MD)	>85 N/5 cm
Tensile Strength (CD)	>73 N/5cm
Elongation at Break (MD)	>650%
Elongation at Break (CD)	>580%

FEATURES

- 5 layer multi-cross blowing technology
- Premium performance in extreme conditions of under -20C
- 24 portions per roll, easy to operate on all cotton pickers
